Original mailed

Dear Minister Murphy:

Thank you for your April 13, 2007 letter responding to our request on March 20, 2007, for the New Brunswick Prescription Drug Program to expedite its review and listing of rituximab (Rituxan®) for the treatment of moderate to severe rheumatoid arthritis.

You noted in your original letter of January 19, 2007, that the Common Drug Review process was valued by the New Brunswick Prescription Drug Program and vitally important to timely decision-making. Yet, three months have passed and we note rituximab has still not been listed on New Brunswick's government sponsored drug benefit plan, *despite having received a "recommend to list" review by the Common Drug Review (see attached document) on February 14, 2007.* We ask again that your department take immediate action to list rituximab on the New Brunswick drug benefit plan.

We remind you that this therapy is intended to treat citizens of New Brunswick with moderate to severe rheumatoid arthritis with an inadequate response to an anti-TNF agent, the current "state-of-the-art" class of treatments. Rituximab is an important medication to include on the drug reimbursement formulary as the research is conclusive that numerous different molecules – like in HIV/AIDS and cancer – cause and promote the disease. Just like in HIV/AIDS, it is a cocktail of medication treatments that help as much as possible to restore the normal immune function of the person living with rheumatoid arthritis. No one person living with rheumatoid arthritis responds to the same cocktail of medications as the next.

For these reasons, and on behalf of its community members living with rheumatoid arthritis, Arthritis Consumer Experts and the Canadian Arthritis Patient Alliance make this second request to immediately list rituximab on the New Brunswick drug benefit plan. *This will have little to no impact on the existing New Brunswick drug budget as rituximab is less expensive than biologic response modifiers currently listed and patients cannot be treated with two biologic response modifiers at the same time.*

We continue to await word from you on New Brunswick's listing decision for rituximab.

Sincerely,

Linda Wilhelm
NB Steering Committee Representative
Canadian Arthritis Patient Alliance
Person with rheumatoid arthritis

Cheryl Koehn
President, Arthritis Consumer Experts
Person with rheumatoid arthritis

Encl.

C.c. Leanne Jardine, Acting Director, New Brunswick Prescription Drug Program
